

PAPER CATS | INSTRUCTIONS

WATCH THE VIDEO

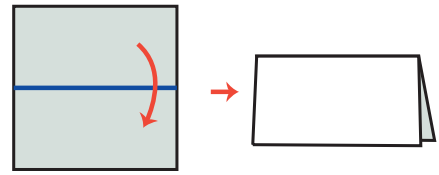

Follow time stamps below steps for extra guidance

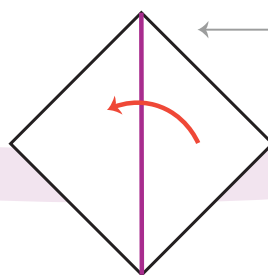

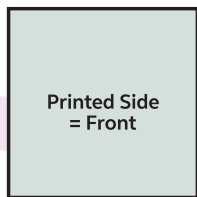

Before you start:

A **valley fold** means that you are creating a valley shape as you fold.

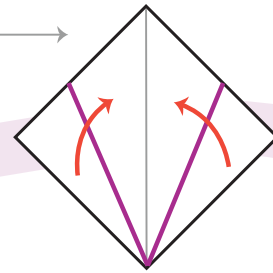

A **mountain fold** means that you are folding away from you to create a "peak".

1. Taking your square piece of paper with the printed side facing away from you, **valley fold** it in half along the diagonal line.

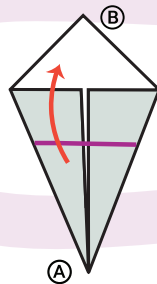

🕒 (23 secs)

Cat face on reverse side

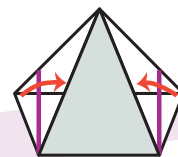

2. Still with the printed side facing away from you, use the crease as a guide to **valley fold** the left and right corners to meet the centre line.

🕒 (26 secs)

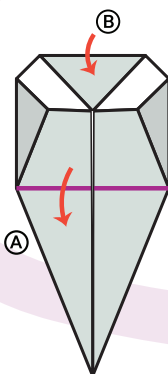

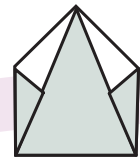

3. **Valley fold** the bottom corner (A) to the top corner (B).

🕒 (41 secs)

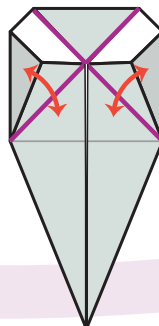

4. **Valley fold** the left and right corners in so that the edges meet the triangular shape.

🕒 (55 secs)

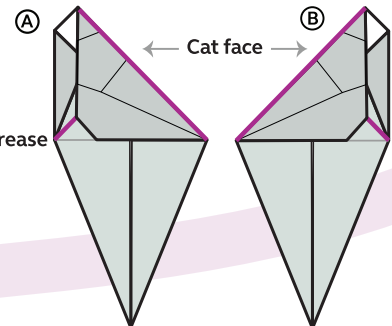

5. Unfold the large triangle (A) then fold the top corner (B) down so that the point meets the horizontal edge, using the line on the printed side as a guide.

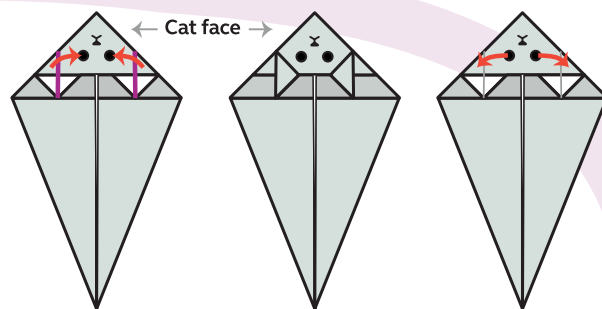

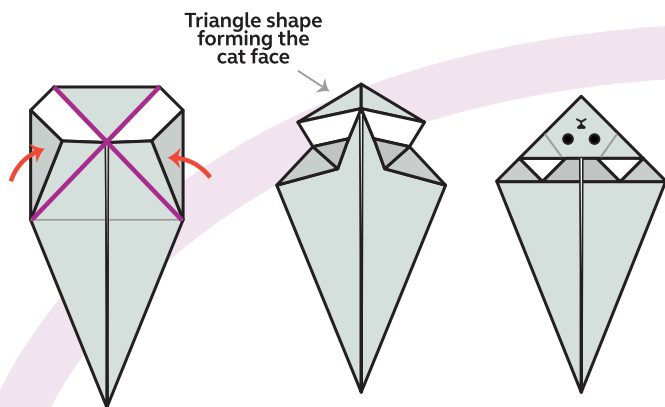

🕒 (1 min 17 secs)

6. One at a time, **valley fold** the right edge to meet the horizontal crease as shown in (A) then repeat with the left edge (B). Make sharp creases along the **diagonal creases** shown in the diagram.

🕒 (1 min 30 secs)

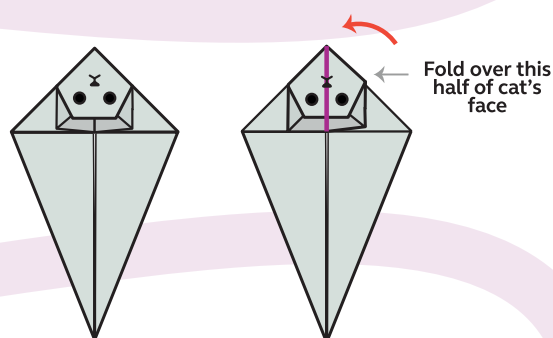

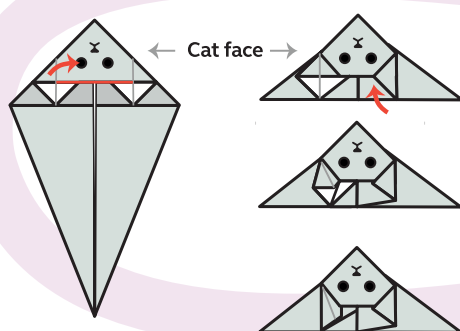

7. Using both hands, push in the **valley folds** you have just made at the same time, pushing inwards in the direction of the marked arrows. As you do this, a triangular shape will form, shaping the face of your origami cat. Adjusting slightly, carefully make sure that everything lays flat as you reinforce the fold.

🕒 (2 mins 19 secs)

8. To make the cat ears, **valley fold** the top layer flaps on the left and right hand sides in the direction of the arrows shown above and unfold once the creases have been made.

🕒 (2 mins 42 secs)

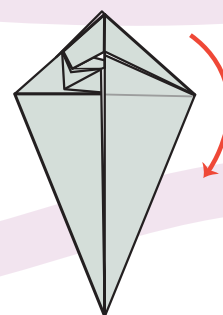

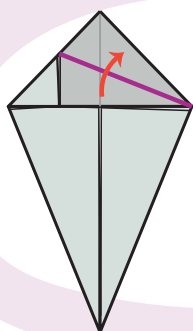

9. Lift the first layer of the cat's face, from the **bottom edge** (marked in red) using your index finger. With your other hand, push the left ear from the left most point inwards and under the cat's face. Repeat for the opposite ear.

🕒 (2 mins 52 secs)

10. Next, lift the right half of the cat's face and ear over to the left side.

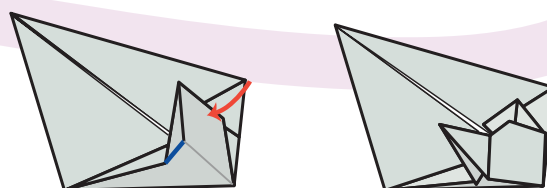

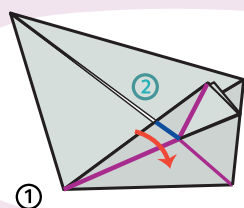

🕒 (3 mins 28 secs)

11. Using the marked **crease line**, **valley fold** diagonally where indicated.

🕒 (3 mins 32 secs)

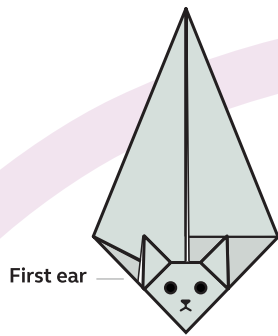

12. Your paper should look as above. Now rotate 180 degrees.

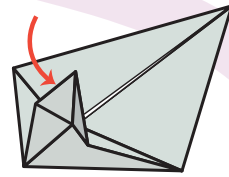

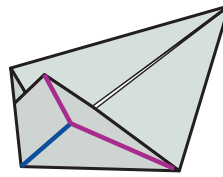

13. To finish forming the ears, **valley fold** and **mountain fold** where indicated (it may be useful to look at the next two diagrams to help understand how the ears are created).

🕒 (3 mins 37 secs)

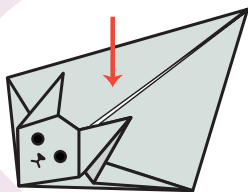

14. As you make these folds, a flap will start to open. Carefully press this flap to flatten it into the shape of the pointed ear.

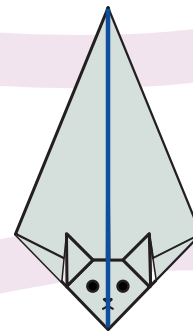

15. The first ear should look like this. Now repeat from step 11 on the other side.
⌚ (3 mins 55 secs)

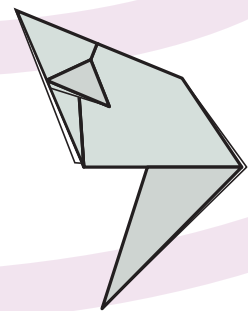

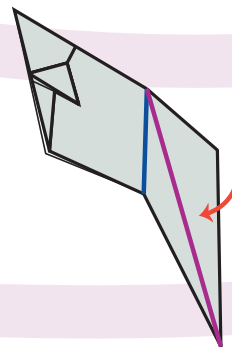

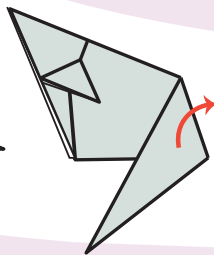

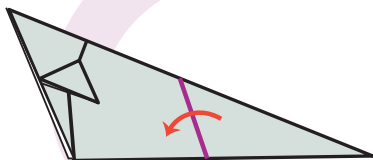

16. Start by pushing the flaps all the way to the other side. Making a diagonal crease, **valley fold** and **mountain fold** where indicated.

17. Again, you should see a flap starting to open. Carefully press this flap to flatten it into the shape of the pointed ear. Well done, the cat's face is now complete!
⌚ (4 mins 8 secs)

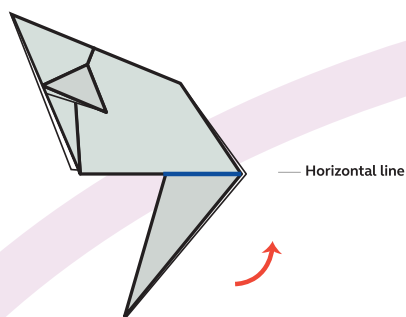

18. **Mountain fold** the entire cat along the centre.
⌚ (4 mins 22 secs)

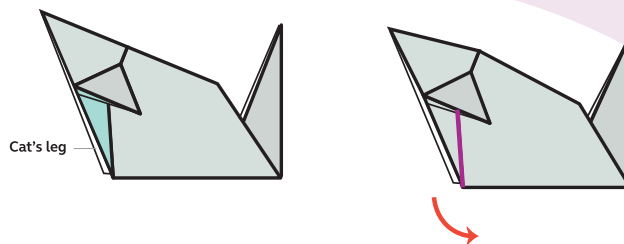

19. Diagonally **valley fold** down the tail to form a crease. You can use this crease line as a guide but you can adjust this crease depending on how big you want your cat's body to be.

For a longer body, make the crease closer to the tail, or for a smaller body, fold the crease closer to the head.
⌚ (4 mins 34 secs)

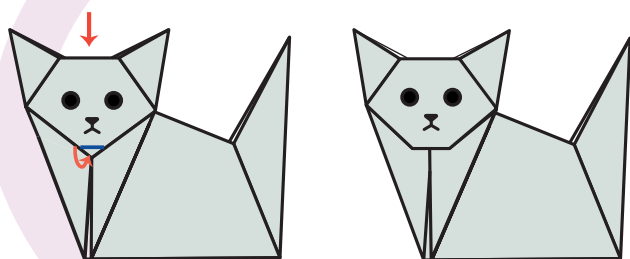

20. Open up the tail a little and push the paper inwards, **mountain folding** along the creases that you've just made. The tail folds should fold in on itself and point downwards as illustrated above.
⌚ (4 mins 43 secs)

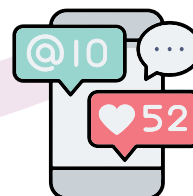

21. Now pull the tail up and fold along the horizontal line so it is pointing up.
🕒 (4 mins 53 secs)

22. Take the **cat's left leg** (there will be two flaps) **valley fold** the whole leg along its **vertical crease line**, pushing the cat's head down and forwards as you do so. You can fold the right leg if you want your cat's head to be facing the opposite way.
🕒 (5 mins 13 secs)

23. As you do this, the head will start to stick up. Being as careful as you can, push the head down so that it lies a little more flat. Finish your cat by tucking up the chin. 🕒 (5 mins 41 secs)

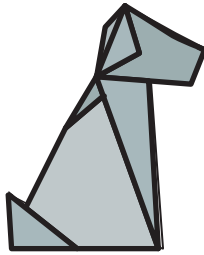

24. Be sure to share your Paper Cat creations on Instagram, Facebook and TikTok and don't forget to tag @pikkiidesign for your chance to win some free cat-related goodies!

BORDER COLLIE / LABRADOR

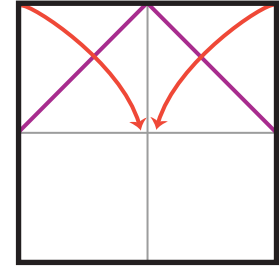

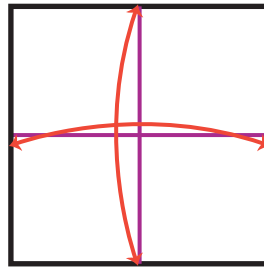

pikkii.

Template 1: Labrador & Border Collie

Dog's face

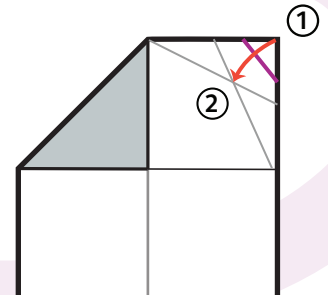

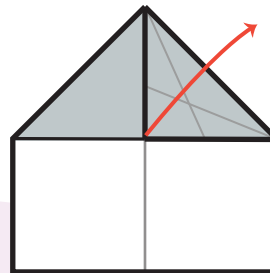

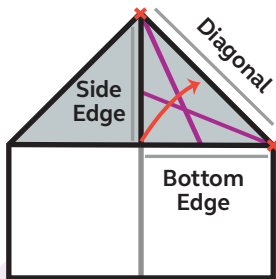

1. Taking your sheet of paper with the dog's face showing, **valley fold** the sheet in half both vertically and horizontally and then unfold so the paper is flat again.

🕒 23 secs

2. **Valley fold** both top corners to the centre.

🕒 40 secs

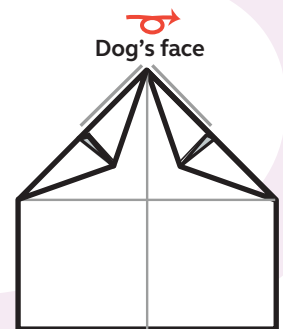

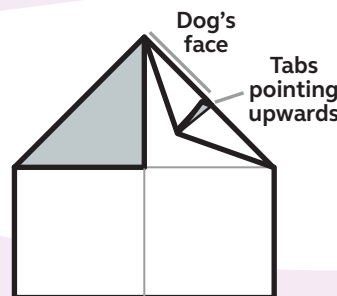

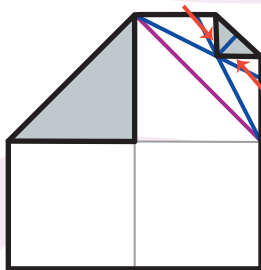

3. With the corner you've just folded, **valley fold** along the **crease lines**, making sure to fold from the **corner points**. Align the bottom edge to the diagonal, make a crease and unfold. Now align the side edge to the diagonal edge, make a crease and unfold.

🕒 47 secs

4. Once the creases are sharp, unfold this panel in the direction of the arrow. 🕒 1 min 4 secs

5. Fold the corner to the intersection point created by the creases just made.

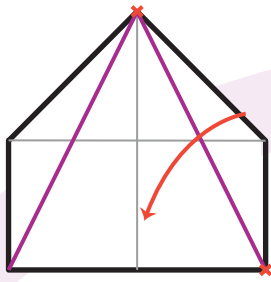

🕒 1 min 7 secs

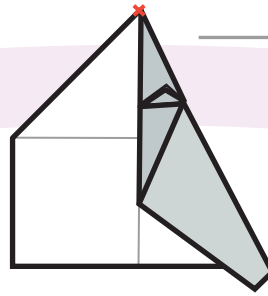

6. Creating **mountain folds** with the creases just made and keeping the corner tab folded down, pinch the corner to point upwards. 🕒 1 min 11 secs

7. Your paper should look as shown above with the folded tabs on top. 🕒 1 min 17 secs

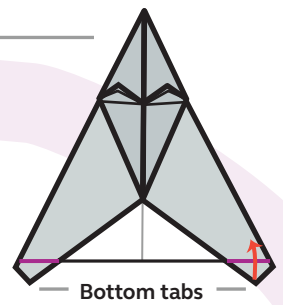

8. Repeat steps 3-7 on the left side. Once your paper resembles the diagram above, flip your paper over so the Pikkii logo is now face up. 🕒 1 min 25 secs

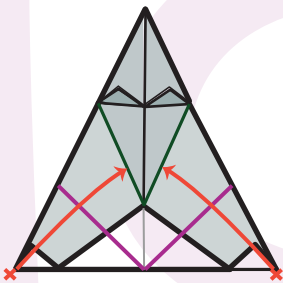

9. With your sheet now turned over, next create a **valley fold** from **corner to corner** on both sides as shown by the marked crease line on the diagram.
⌚ 2 mins 38 secs

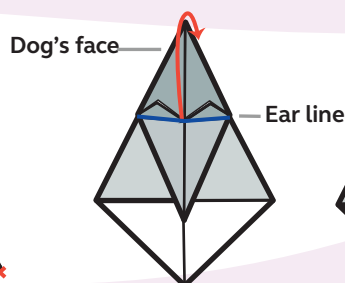

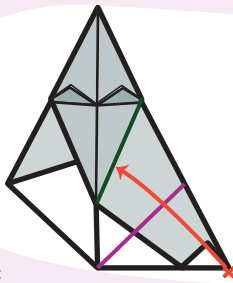

10. Reinforce the folds to make sharp creases that join to a **point at the top**.

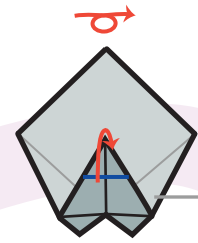

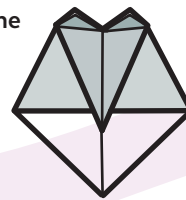

11. At this point you will see the face of the pup start to form. Now fold up the bottom tabs along the **crease lines** shown.
⌚ 3 mins 15 secs

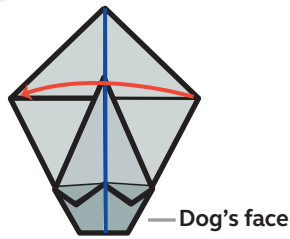

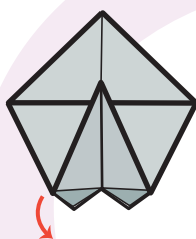

12. Valley fold the bottom corners up so they tuck under the **"V" shaped flaps** on each side, aligning the bottom edge with the vertical centre.
⌚ 3 mins 35 secs

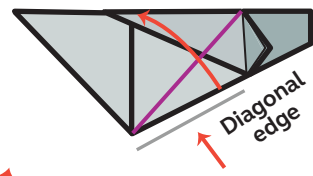

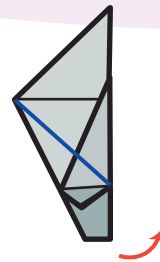

13. Once your sheet looks as above. Fold the top point backwards to make a **mountain fold** along the "ear" line. Flip the whole paper over and horizontally.
⌚ 3 mins 55 secs

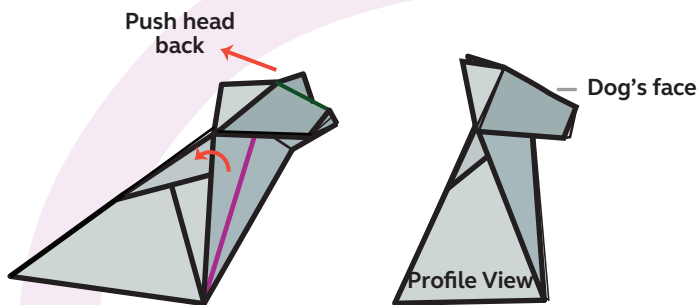

14. To form the face of the dog, **mountain fold** the bottom point under along the dotted line. Flip your sheet vertically.
⌚ 4 mins 6 secs

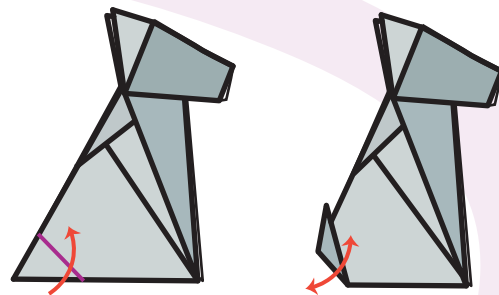

15. The reverse should look like the diagram above. Next, untuck the dog's head from behind. Now fold down the centre line, making a sharp crease.
⌚ 4 mins 36 secs

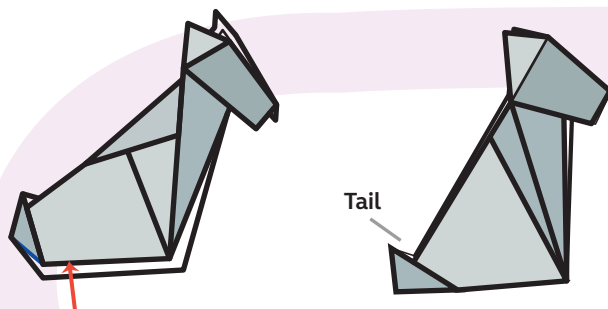

16. Next, opening from the direction of the **arrow**, **valley fold** the diagonal edge along the crease line illustrated above.
⌚ 4 mins 52 secs

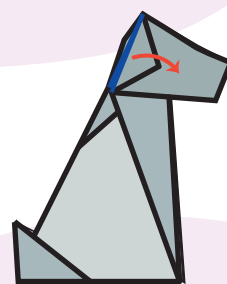

17. Repeat this diagonal fold on the other side, pushing the head back and reinforcing the **face fold**. Align the ears as you do so. You should now be able to recognise your paper pup from a side profile. 🕒 5 mins

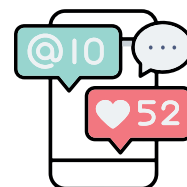

18. To create the tail, **valley fold** the tip upwards to make a sharp crease. Unfold the crease just made. The next step will involve folding the crease back on itself. 🕒 5 mins 40 secs

19. Opening the layers from the direction of the **arrow**, refold the crease back on itself so it becomes a **mountain fold**, to make the tail point up. 🕒 5 mins 46 secs

20. Adjust the ears and **fold** down in the position you desire. And there you have it...another paper pooch to add to your puppy family. 🕒 5 mins 59 secs

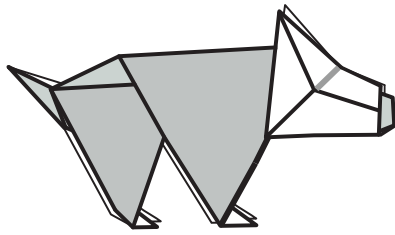

21. Share your pup creations with your pup-loving friends on Instagram, Facebook and TikTok. Tag @pikkiidesign for your chance to win some free pup-related goodies!

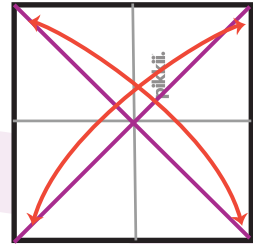

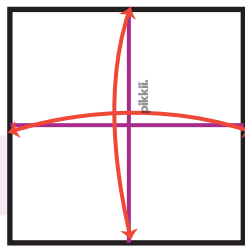

FRENCH BULLDOG/ PUG

EASY VIDEO
INSTRUCTIONS

Check dog's face is
on the back

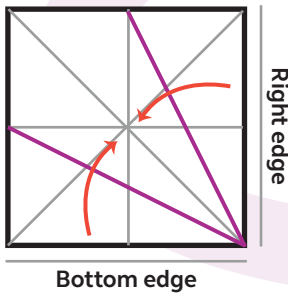

Template 2: French Bulldog & Pug

1. Taking your sheet of paper with **Pikkii logo side up**, check the printed dog face is on the top edge on the reverse. Now **valley fold** your sheet of paper in half both vertically and horizontally

🕒 6 mins 22 secs

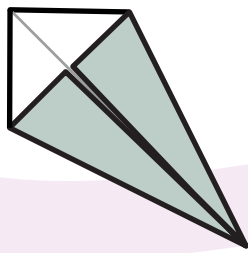

2. **Valley fold** your paper in half diagonally in both directions, making sharp folds as you do so.

pikkii.

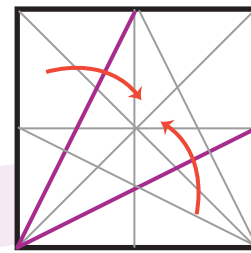

Right edge

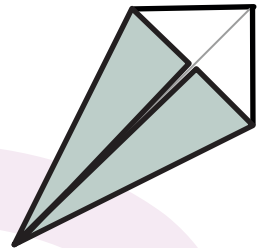

Bottom edge

Left edge

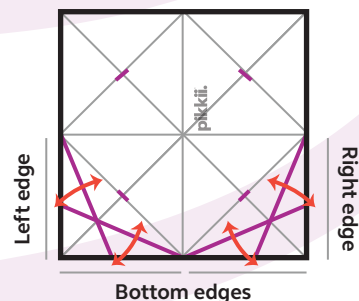

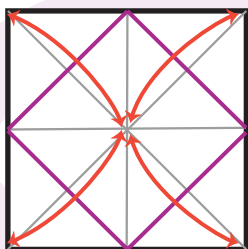

Bottom edge

3. Take the right edge and make a fold line along the marked **crease line** by aligning it with the **diagonal crease** just made. Now fold the bottom edge to the same diagonal line to make a sharp crease.

4. Now create fold lines in the same way as step 3 but on the opposite side. **Valley fold** the bottom edge to **diagonal crease (in bold)** followed by the left edge, aligning with the diagonal each time.

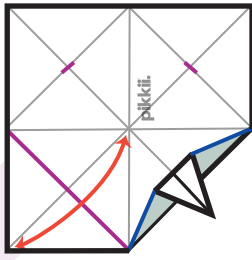

5. **Valley fold** in each corner to the centre and unfold to a square sheet again.

🕒 6 mins 48 secs

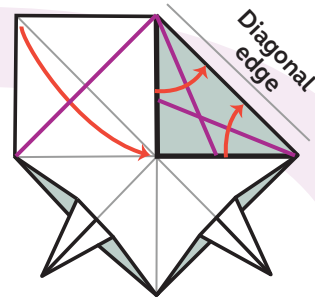

6. Starting with the bottom edges, fold them up to the marked **intersection points**, following the direction of the corresponding arrows. Do the same with the left and right edges, folding them up to the marked **intersection points**.

🕒 7 mins 30 secs

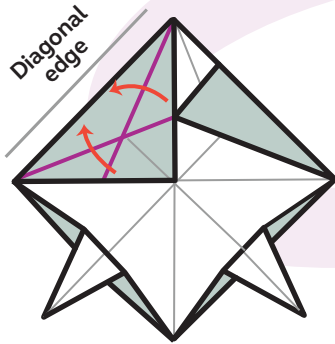

7. **Valley folding** the corners to the centre again, fold the creases made in step 4 into **mountain folds** to create a point as shown above. Repeat on the left side.

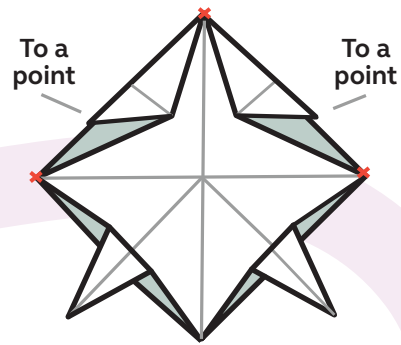

🕒 7 mins 58 secs

8. Now fold the top left and right corners into the centre. Next create **valley folds** along the **crease lines**, marked on the right side of the sheet, folding the edges to the diagonal edge. 🕒 9 mins 11 secs

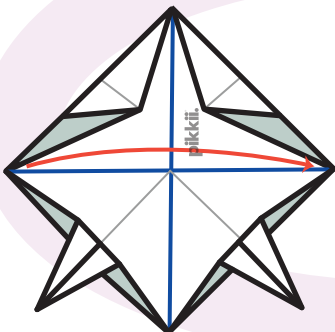

9. Repeat these **valley folds** on the left side, aligning the edges to the diagonal before creasing.

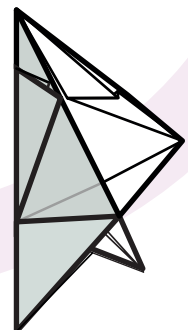

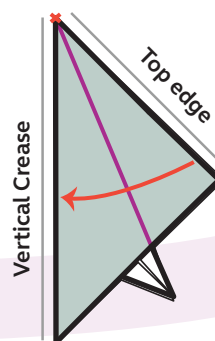

10. Now, one side at a time, follow the creases you just made, starting from the **corners points** marked with the **crosses**. As you do so, it will create a triangle flaps. Your paper should look as per the diagram above.

🕒 9 mins 35 secs

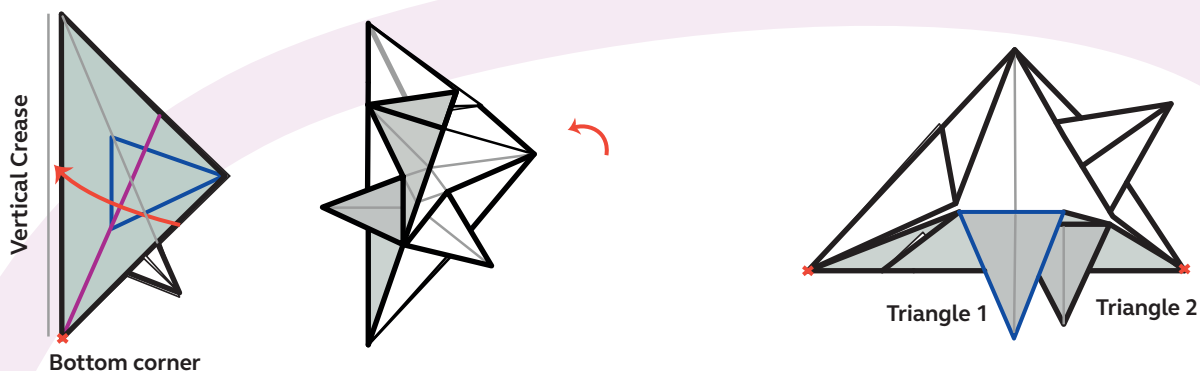

11. Now **fold** your paper in half along the vertical line. 🕒 10 mins 32 secs

Top corner

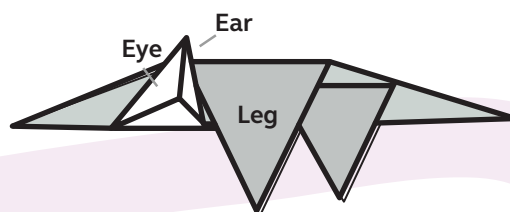

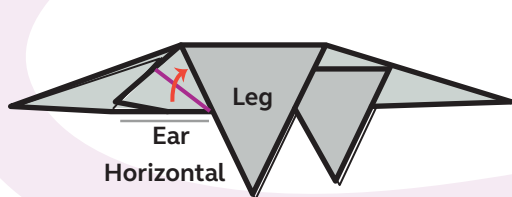

12. Starting with the top layer, begin to **valley fold** the top edge to the vertical crease, following the **fold line** marked from the top corner. Create the crease and unfold again.

13. Now **valley-fold** the right edge (top layer only) to the vertical crease, following the **fold line** from the bottom corner to make a sharp crease. From the folds just made, look for the **triangle shape** formed by the creases. Rotate your paper 90 degrees.

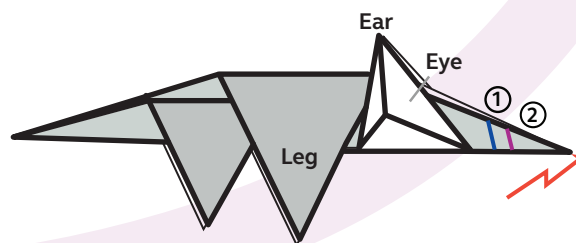

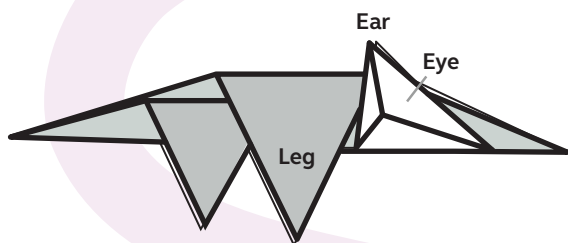

14. Now following along the creases you've just made and starting from the **corner points**, create the **triangle shape** and flatten down to enforce the creases. Your paper should look like the diagram above, with the two triangles pointing down to form the legs of your paper pup. Repeat steps 10 to 12 on the flip side.

🕒 11 mins

15. The smaller triangle tab poking out will form the ear. Opening up from the direction of the arrow, **valley fold** the horizontal edge to align with the edge of the leg and flatten to make a crease. This will reveal the pup's eye.

🕒 13 mins 5 secs

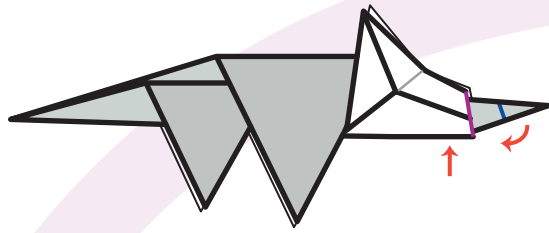

16. Flip your paper and fold the second ear as per step 13 to resemble the illustration above.

🕒 13 mins 43 secs

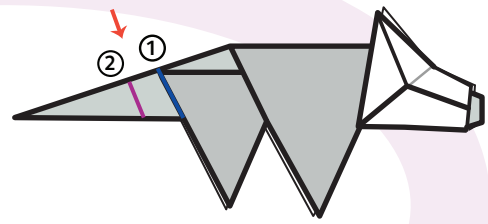

17. To create the face, step fold along the **crease lines**, **mountain folding** along the first crease and then **valley folding** along the second.

🕒 14 mins 44 secs

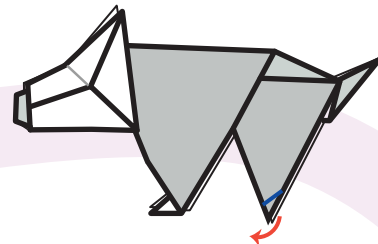

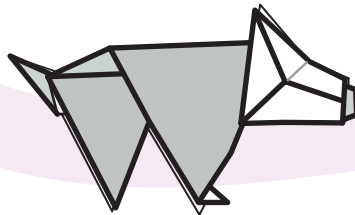

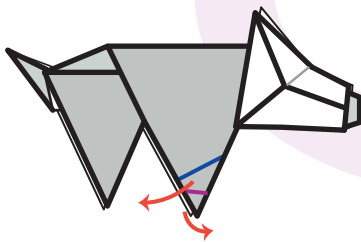

18. Opening up from the direction of the arrow, fold the creases back on themselves to make the dog's muzzle. Now **fold the tip** of the nose and tuck up underneath.

15 mins 4 secs

19. Use the same process to make the tail, step-folding along the **crease lines**, **mountain folding** along the first line and **valley folding** along the second. Open up from the top to reverse the folds and allow the tail to poke out. You can tuck in the tail once more to make a flat tip if you prefer.

15 mins 58 secs

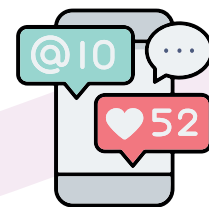

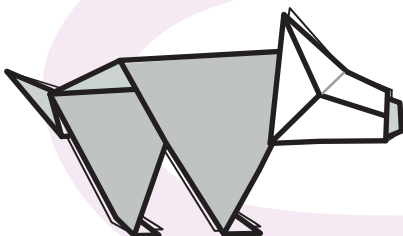

20. Following the crease lines illustrated above, first **mountain fold** the front leg (in the direction of the tail) and then **valley fold** forward along the second marked **crease line** to form the little paws. Do the same on the other side to make the second front paw.

16 mins 27 secs

21. **Mountain-fold** the tip of each of the back legs so they point forwards and the feet are level. Adjust the creases on the face, tail and feet until you are happy with how your paper pup looks and it stands upright.

17 mins 13 secs

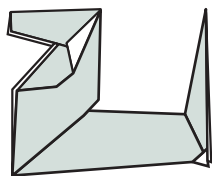

22. And there you have it! Well done. Remember, it will become easier with practice.

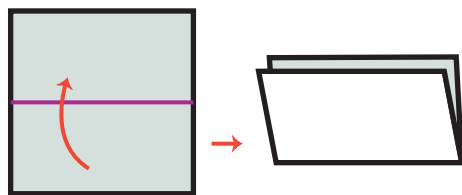

17 mins 45 secs

23. Share your pup creations with your pup-loving friends on Instagram, Facebook and TikTok.

Tag @pikkiidesign for your chance to win some free pup-related goodies!

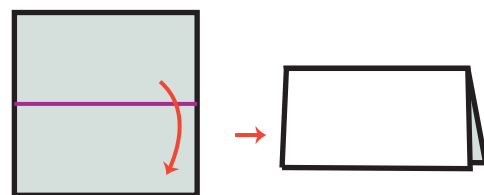

Template 3:
Dachshund

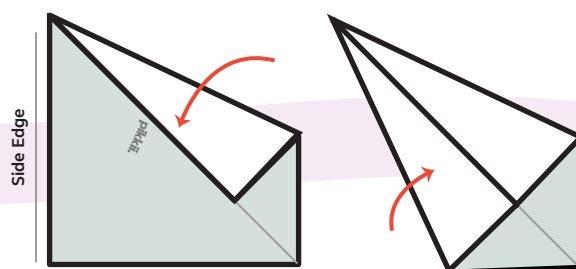

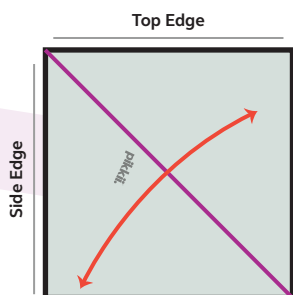

Before you start:

A **valley fold** means that you are creating a valley shape as you fold.

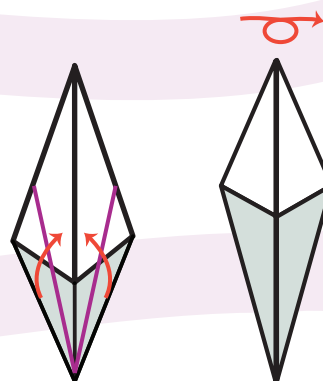

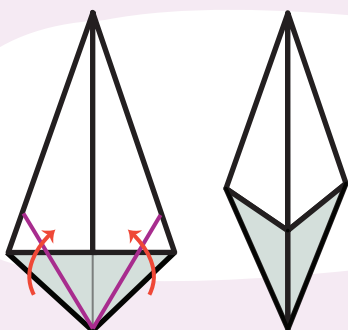

Before you start:

A **mountain fold** means that you are folding away from you to create a "peak".

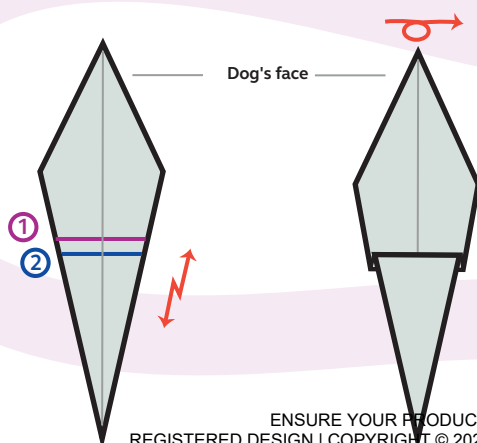

1. Taking your printed piece of paper, **Pikkii logo side up**, as shown above, **valley fold** it in half along the diagonal line to make a crease. ⌚ 18 mins 3 secs

2. **Valley fold** the top edge to the crease line just made. Now fold the side edge to diagonal crease line. ⌚ 18 mins 21 secs

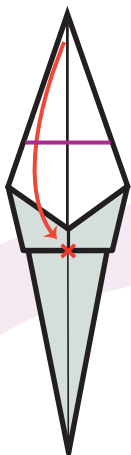

3. Using a **valley fold**, fold each edge to the centre as marked with the dotted lines above. ⌚ 18 mins 50 secs

4. **Valley fold** each edge to centre once again, following the **crease lines** as illustrated. Now flip your sheet over. ⌚ 19 mins 15 secs

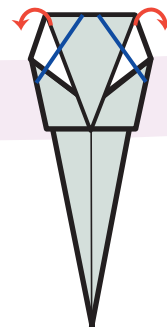

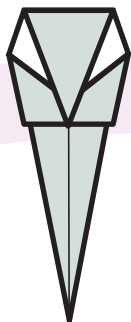

5. Taking the bottom point, **valley fold** to the top point and then **mountain fold** along the second dotted-line shown on the diagram. Don't worry if the lines on your paper pup don't line up exactly at this stage. Now flip your paper over once more. ⌚ 19 mins 46 secs

6. Taking the top point, fold it down the intersection point marked with an **X**.

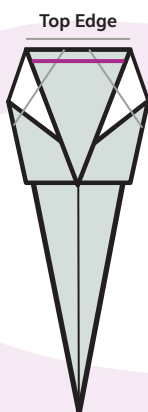

🕒 20 mins 34 secs

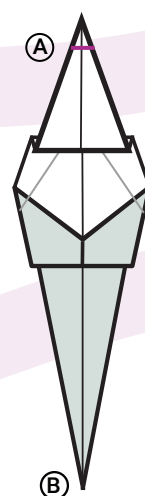

Dog's face

7. Following the **crease lines**, **mountain fold** the edges back to shape the dog's face.

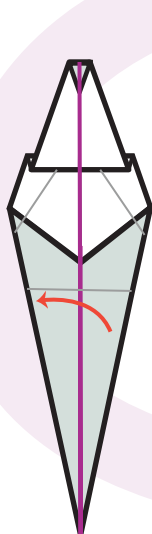

🕒 20 mins 51 secs

8. **Valley fold** along the **crease line** shown above, approximately 1mm (0.04 inches) from the top edge. 🕒 21 mins 40 secs

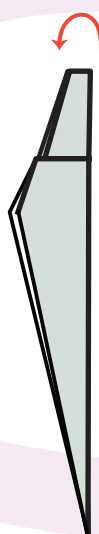

9. **Valley fold** the very top point **A** down along the line shown above. This will shape the tip of the dog's nose. Next, pull out the bottom fold by pulling the bottom point **B**. 🕒 21 mins 26 secs

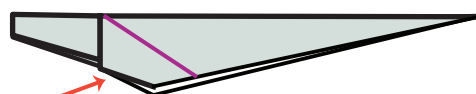

10. **Valley fold** in half along the vertical line so it looks like above.

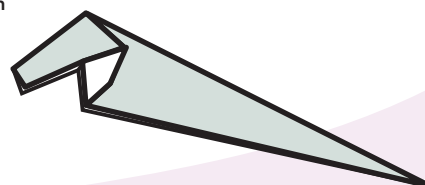

🕒 21 mins 47 secs

Dog's face

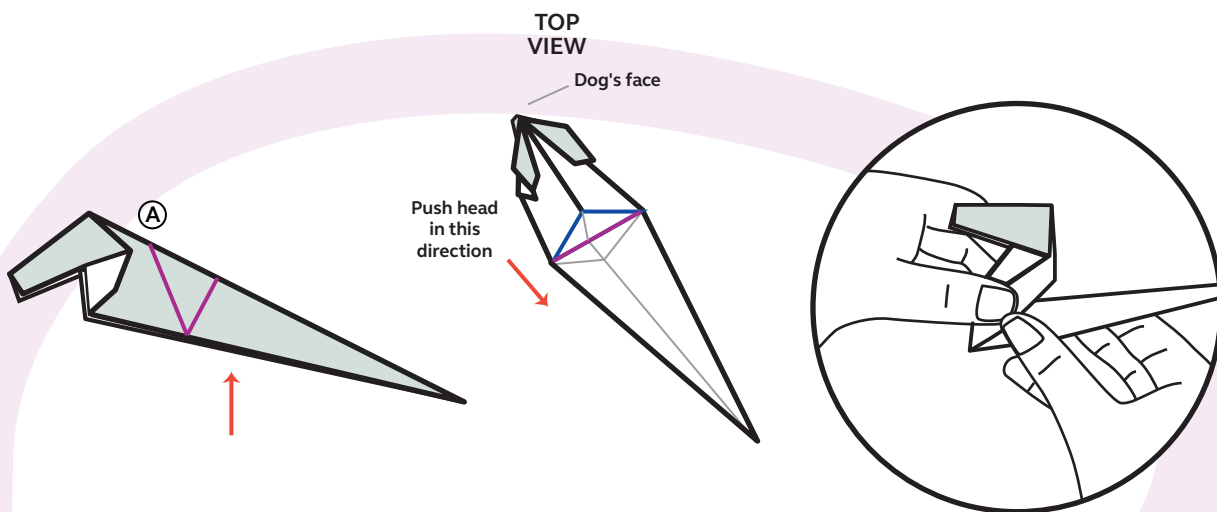

Open & push in this direction

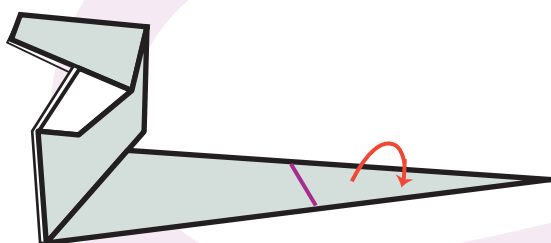

11. Rotate the paper 90 degrees to resemble the diagram. Now, make a **valley fold** along the crease line in the diagram, push the head back along this crease by opening up slightly from beneath.

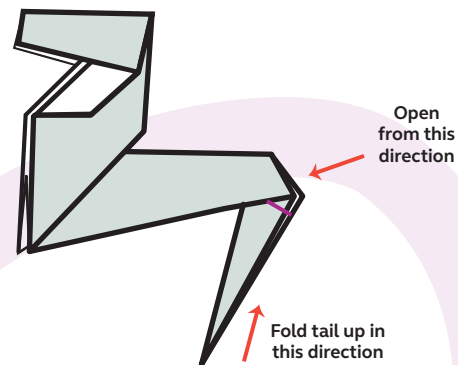

🕒 22 mins 15 secs

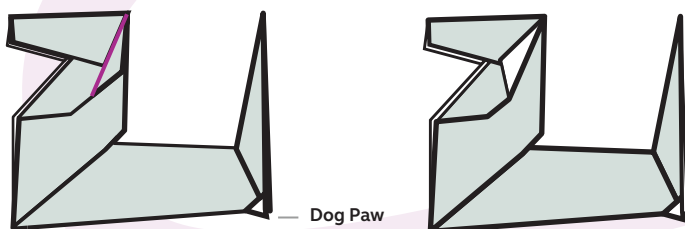

12. Make another **valley fold** along the crease line (A). Now open up from underneath and push the head back along the crease just made to make them into **mountain folds**. This should form the upright torso of the dog. 🕒 22 mins 30 secs

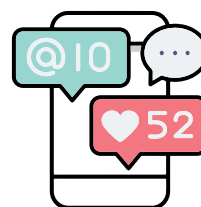

13. Make another **valley fold** along the dotted line to mark where the tail is. Now open up from underneath and push the point of the tail down along the crease just made to make a **mountain fold**. 🕒 22 mins 48 secs

14. **Valley fold** along the crease line shown above. Now open up from the direction marked with an arrow and lift the point of the tail upwards, going back against the crease just made. This will form the paw and tail of the dachshund. 🕒 23 mins 3 secs

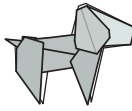

15. Finally, **valley fold** the ears of the dog so they point forward. And there you have it! 🕒 23 mins 17 secs

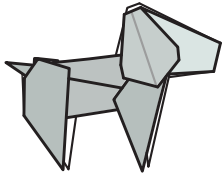

16. Share your pup collection with your pup-loving friends on Instagram, Facebook and TikTok. Tag @pikkii design for your chance to win some free pup-related goodies!

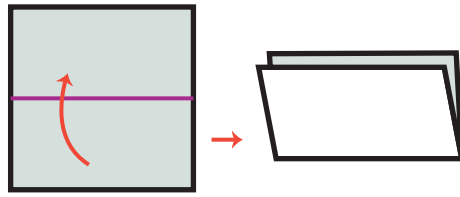

COCKER SPANIEL ENGLISH SPRINGER SPANIEL CAVALIER KING CHARLES SPANIEL

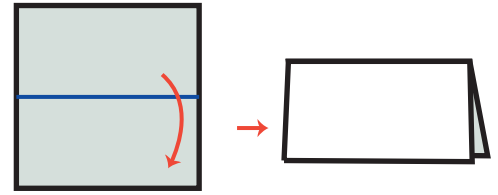

SCAN ME FOR
EASY VIDEO
INSTRUCTIONS

Template 4: Cocker
Spaniel, English Springer
Spaniel, Cavalier King
Charles Spaniel

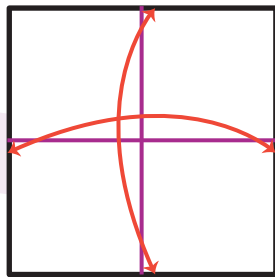

Before you start:
A **valley-fold** means that you are creating a valley shape as you fold.

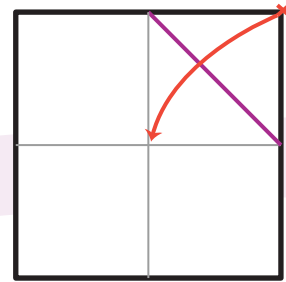

A **mountain-fold** means that you are folding away from you to create a "peak".

Dog's Face

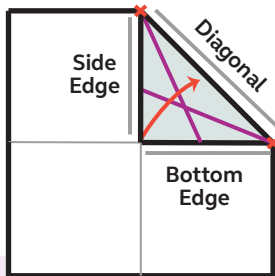

1. Taking your sheet of paper with the pup's head **at the top**, **valley fold** the sheet in half both vertically and horizontally and unfold flat again.

🕒 23 mins 25 secs

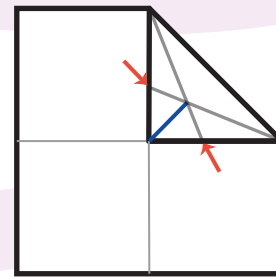

2. **Valley fold** the top right corner to the centre.

🕒 23 mins 56 secs

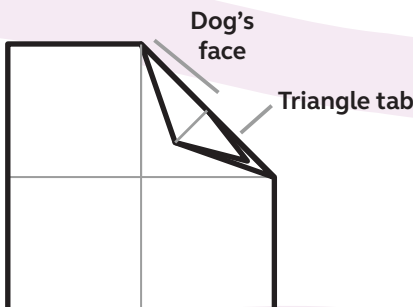

3. With the corner you've just folded, **valley fold** along the **crease lines**, making sure to fold from the **corner points**. Align the bottom edge to the diagonal, make a crease and unfold. Now align the side edge to the diagonal edge, make a crease and unfold.

🕒 24 mins 6 secs

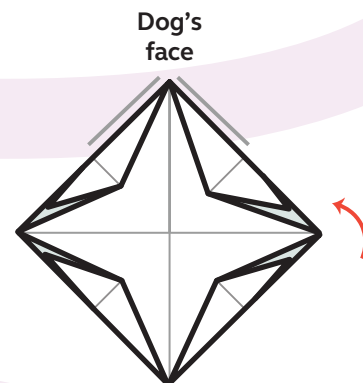

4. Now folding along both the creases just made, create a **mountain fold** along the crease illustrated in the diagram to pinch the corner to a point.

🕒 24 mins 17 secs

5. Your paper should look like the diagram above with the **triangle tab pointing upwards**.

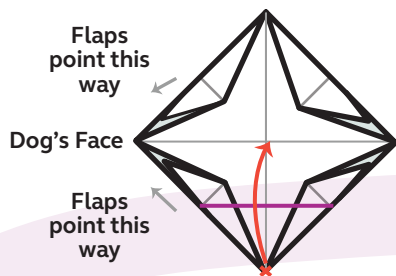

🕒 24 mins 40 secs

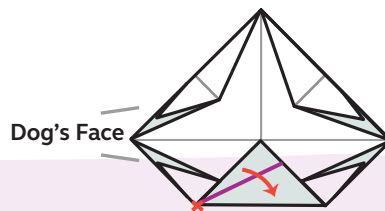

6. Repeat steps 2-6 on the remaining three corners. Rotate your paper so the dog's **face pointing to the left**.

🕒 27 mins

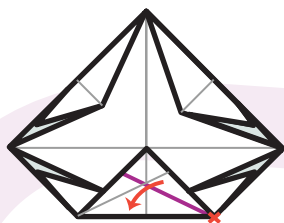

pikkii.

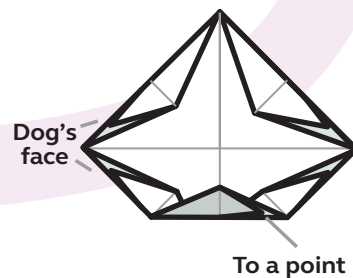

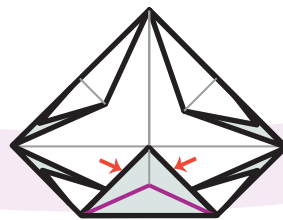

7. Make sure the flaps are pointing to the left before **valley folding** the **bottom point** up to the centre line. Note: The next few steps may be a little fiddly. ⌚ 27 mins 3 secs

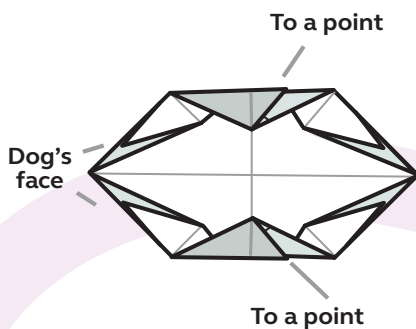

8. From the corner marked with a **cross**, create a fold along the **crease line** by valley folding the left edge down to the horizontal edge. ⌚ 27 mins 14 secs

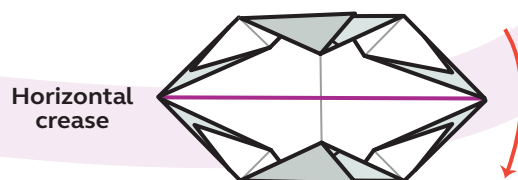

9. Create a second crease from the opposite **corner**, again, aligning the (right) side edge to the bottom horizontal edge, ensuring the folds are sharp. ⌚ 27 mins 21 secs

10. Like in step 5 create a pinching motion to bring the corner to a point by folding along the crease lines just made. Look at the next step to see how it should look. ⌚ 27 mins 30 secs

11. Repeat steps 7-11 on the opposite side, following the **valley folds** and pinching to a point. ⌚ 27 mins 40 secs

12. Now **valley fold** the sheet in half along the **horizontal crease line** illustrated above. ⌚ 28 mins 25 secs

Top layer

13. With your paper now folded in half, fold the top layer down along **horizontal crease line**. ⌚ 28 mins 30 secs

14. Flip the paper over and **valley fold** the top layer on this side down as per the previous step.

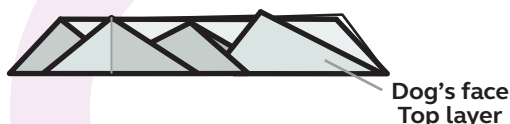

15. Now pull out right tab **(A)** that is tucked behind (as marked by the arrow) undoing the crease so it resembles the diagram **(B)** above.

🕒 28 mins 54 secs

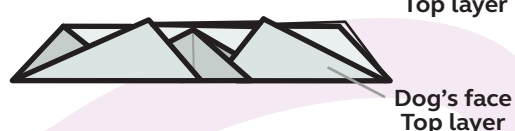

16. Next pull out left tab as marked by the arrow in the same way as you have just done, pulling out the crease as you do so.

🕒 29 mins 4 secs

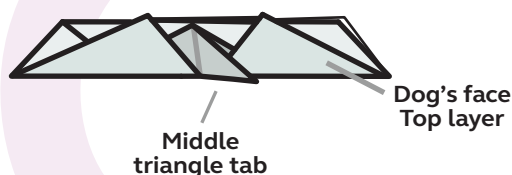

17. Now working with the first layer, **valley fold** from the right point **(marked with a cross)** to create a sharp diagonal crease that will reveal the dog's face.

🕒 29 mins 30 secs

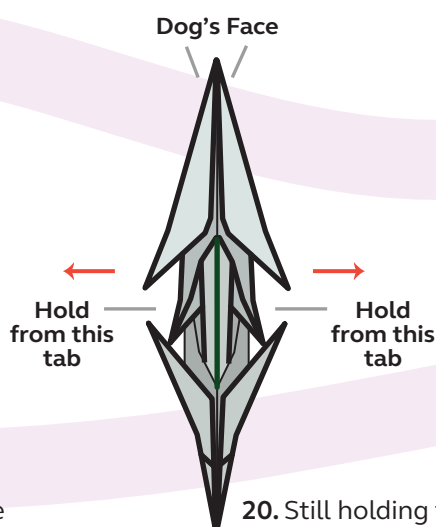

18. Repeat this crease on the left side, this time, creating the valley fold from the **left most point**. This will start to form the dog's back legs. 🕒 29 mins 44 secs

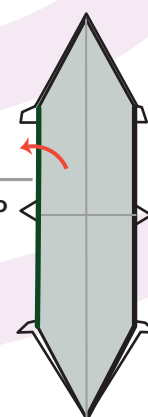

19. Take your paper, and hold it by the middle triangle tabs from either side. From the top view, pull open **(in the direction of the arrows)** from the middle tabs you are holding.

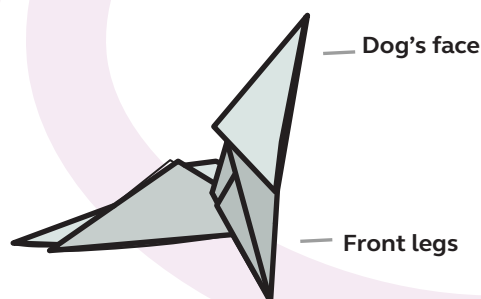

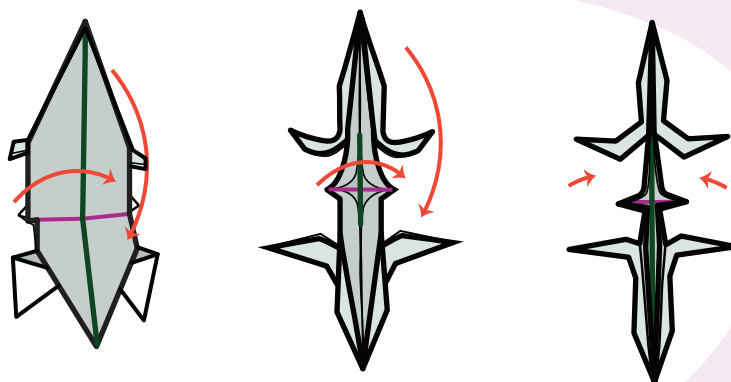

🕒 30 mins 30 secs

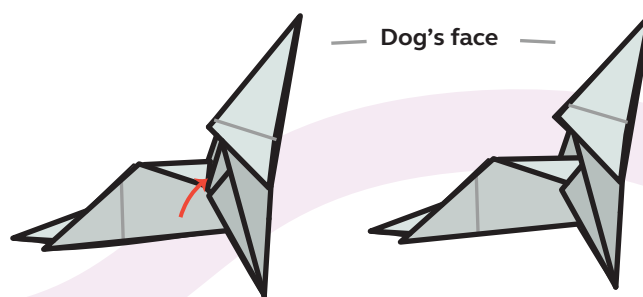

20. Still holding the middle tabs and with the paper now opened up, push the **central vertical crease** to one side so it resembles the diagram above. 🕒 30 mins 43 secs

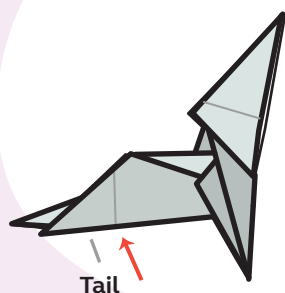

21. Holding the middle tabs from each side again, now begin to **valley fold** your paper in half along the horizontal line. Start to pinch inwards as you fold it closed along the **vertical** as well. 🕒 30 mins 47 secs

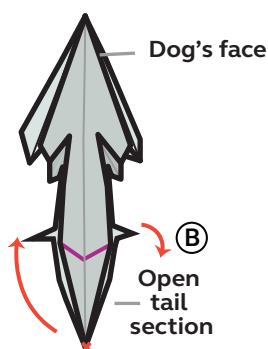

22. As you pinch in, aim to make an "L" shape like the diagram above. The tabs you were holding will form the front legs. 🕒 31 mins 25 secs

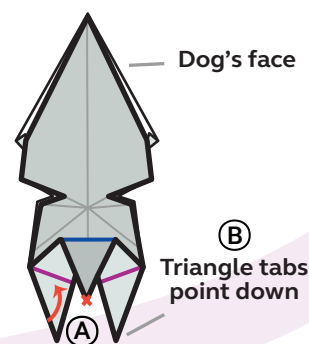

23. Now for the detail. Look out for the corner tab (**marked by the arrow**) on either side of the pup's front legs. Push this corner in on both sides, just so that it is hidden by the front legs. 🕒 31 mins 26 secs

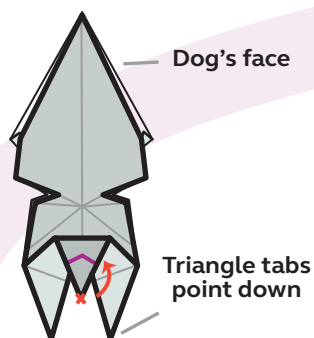

24. Open up the layers under the tail section to reveal the inside. The next steps will involve forming the tiny tail that pokes out from the pup's body. 🕒 32 mins 9 secs

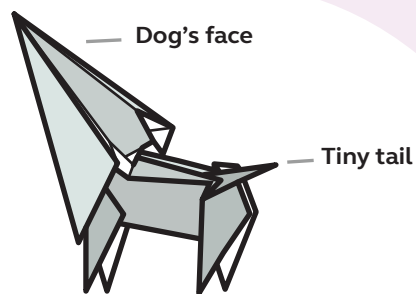

25. Taking the bottom point (**marked with a cross**), pull it up so it **valley folds** along the **vertical** and the middle triangle tabs point downwards to make the pups' back legs. Next, **mountain fold** the pointed section down along the marked **crease line**. 🕒 32 mins 20 secs

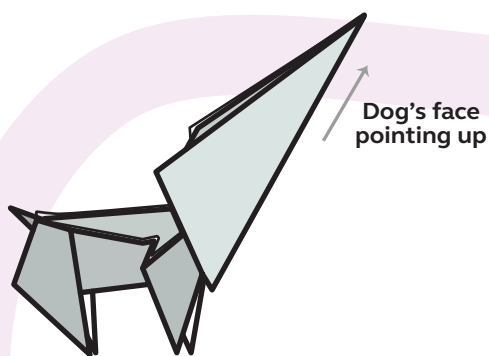

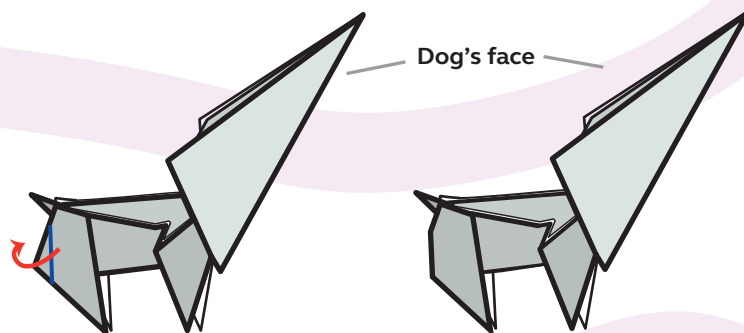

26. Again, taking the bottom point (marked with a cross), valley fold it up along the crease lines to make the tiny tail point up. 32 mins 39 secs

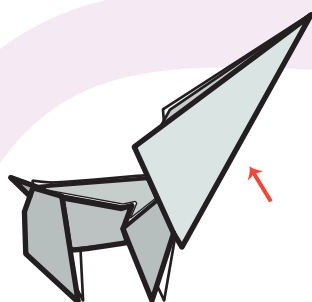

27. Now you are ready to valley fold the paper pup closed again along the vertical crease line, allowing the little tail to poke out. 32 mins 50 secs

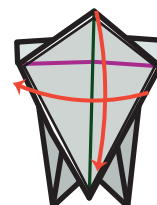

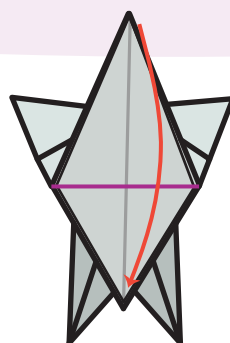

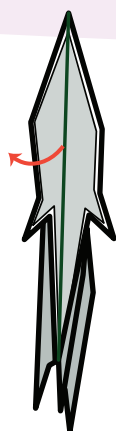

28. From the side, your paper pup should resemble the diagram with the face pointing up.

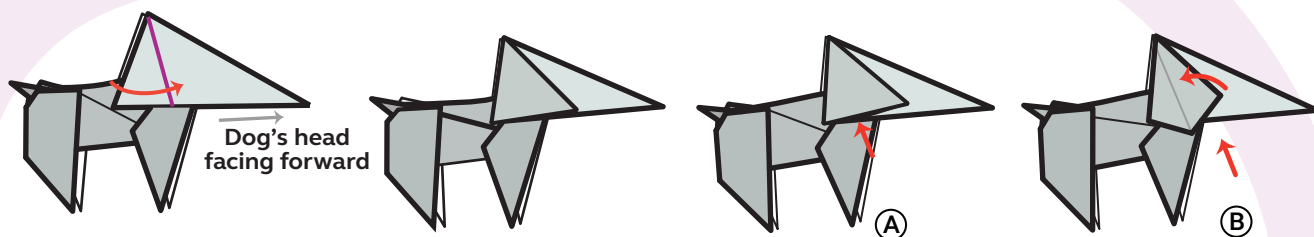

29. To shape the hind legs, mountain fold the back corners to tuck them in. Do this on both legs and adjust the folds until the legs look how you want. 33 mins 39 secs

30. Now it is time to form your paper pup's head. Start by opening up the layers from beneath the chin. When you see the central fold, push it over to one side. 34 mins 13 secs

31. Opening up fully from this angle, begin to valley fold head down along the horizontal crease line. At this point, you will need to fold along the vertical crease to make the head face forwards. 34 mins 18 secs

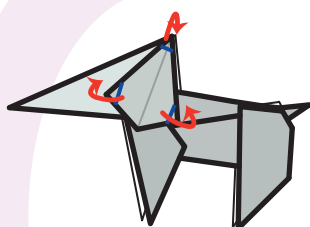

32. The pup's head should now be facing forward. **Valley fold** the ears on either side forward creating a crease from the point at the pup's crown and making a **diagonal fold**.

🕒 34 mins 45 secs

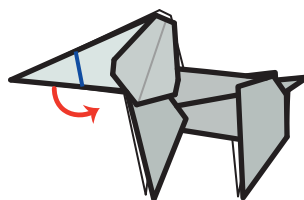

33. Flatten out the ear by opening up between the layers, (A) in the direction of the arrow and fold the ear to the left to make the shape shown in the diagram (B).

🕒 34 mins 57 secs

34. To shape the ears, **mountain fold** at the crown and tuck in. You can do the same on the bottom and back corners of the ears as illustrated above. Repeat this process (step 33 & 34) on the opposite ear.

🕒 35 mins 44 secs

35. Opening from under the chin, **mountain fold** at the edge of the printed face on your paper pup and tuck the point under to form the dog's muzzle. Finally, reinforce any folds to straighten up your pup until you're happy with how it looks and it stands upright. And there you have! Another paper pup. Well done for hanging in there because this was a tough one.

🕒 36 mins 30 secs

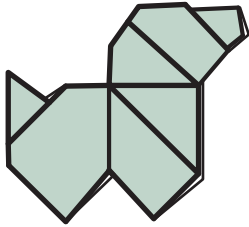

36. Don't forget to share your pup creations with your pup-loving friends on Instagram, Facebook and TikTok. Tag @pikkiidesign for your chance to win some free pup-related goodies!

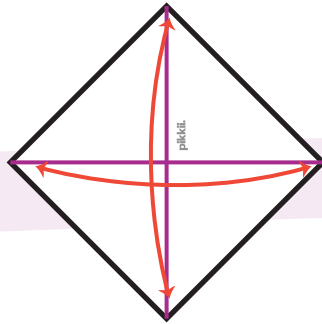

SHIH-TZU/ YORKSHIRE TERRIER

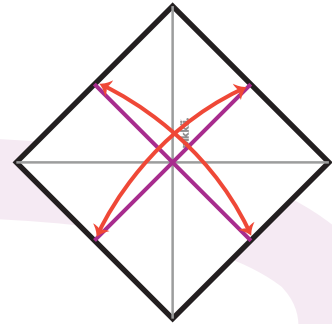

SCAN ME FOR
EASY VIDEO
INSTRUCTIONS

Template 5: Shih-Tzu & Yorkshire Terrier

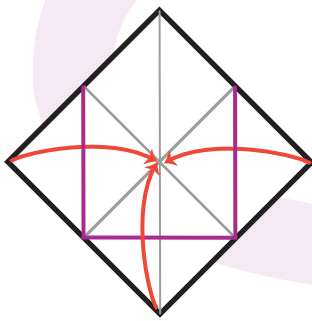

1. Taking your sheet of paper with the **Pikkii logo side up**, fold the left corner to the right and open again. Then fold the top corner to the bottom corner to make **crease lines** as shown above. ⌚ 37 mins 40 secs

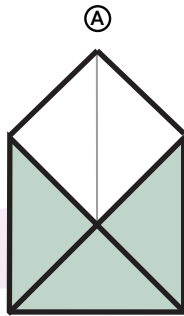

2. **Valley fold** your paper along the diagonal crease lines shown above, folding the opposite sides, edge to edge and reinforcing the folds. ⌚ 38 mins

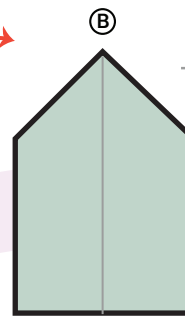

pikkii.

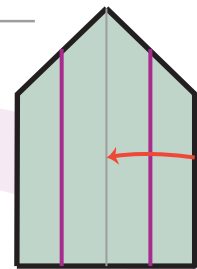

3. Fold the left corner to the centre, then the right corner followed by the bottom corner. ⌚ 38 mins 26 secs

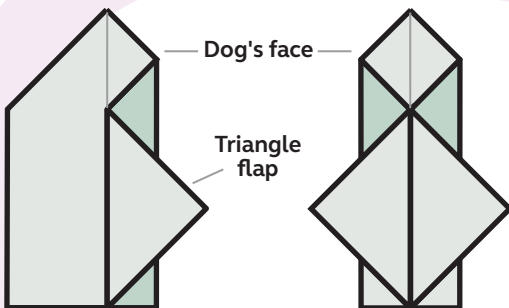

4. Your paper should look as shown above (A). Now flip your paper over (B). ⌚ 38 mins 46 secs

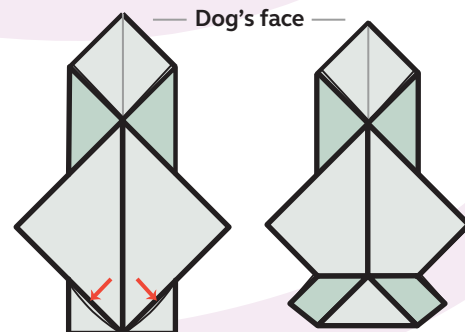

— Dog's face —

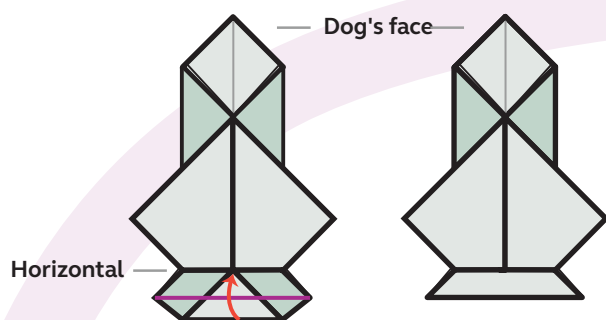

5. Next, take the right edge and **valley fold** to the centre crease. ⌚ 38 mins 49 secs

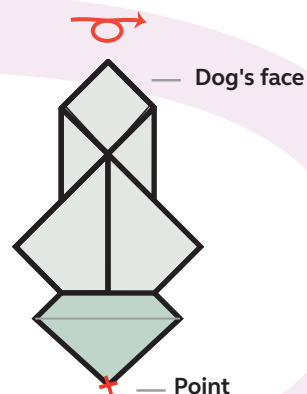

6. The triangle flap should reveal itself. Repeat this step on the left side.

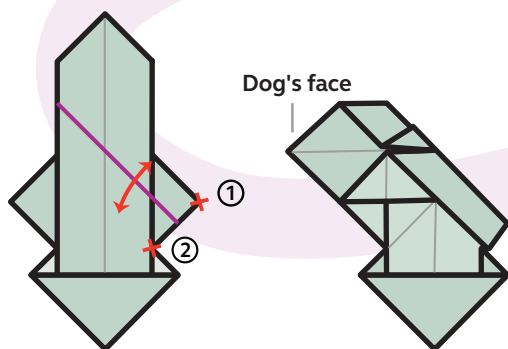

7. Using your fingers to get in-between the paper, where the arrows are marked, open out the flaps and fold flat.

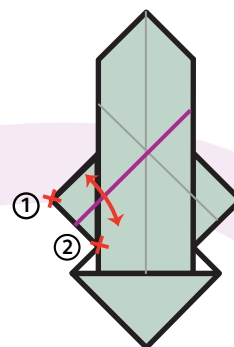

8. Next, **valley fold** the bottom edge up to the horizontal.

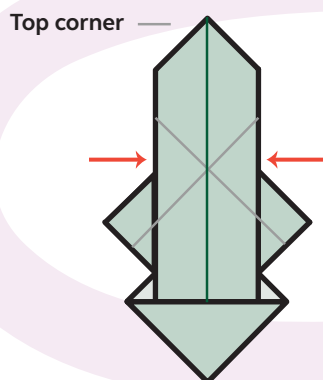

9. Remove the flap from underneath to reveal the point then flip your paper over.

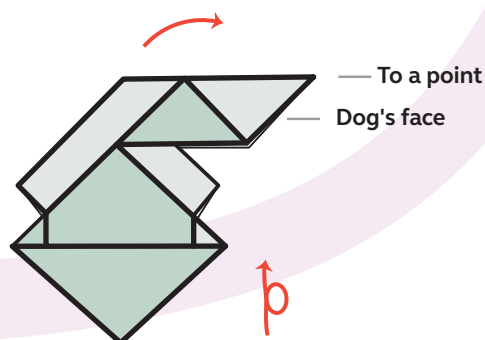

10. Starting with the right, create a crease along the dotted line by folding point 1 to point 2 so that the **crosses** shown above align.

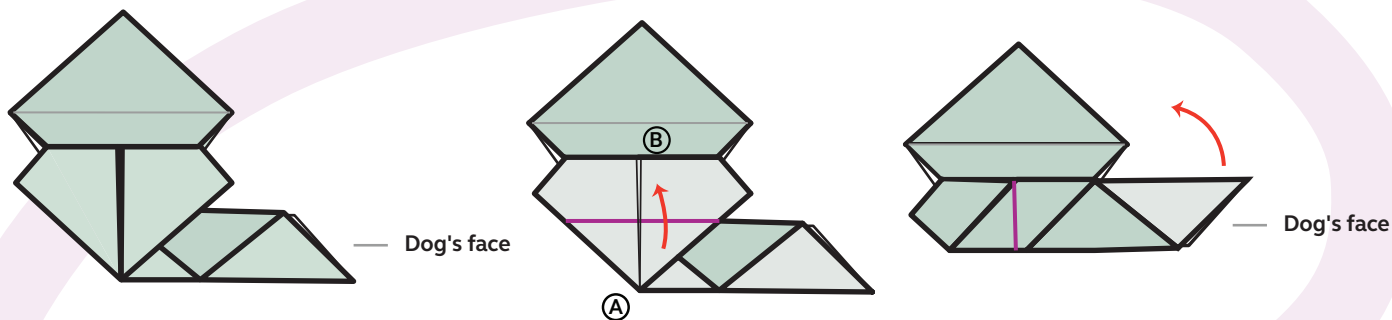

11. Repeat this fold on the left side, ensuring sharp creases have been made, aligning point 1 with point 2 as you make the fold.

12. Folding along both **valley folds** you just made, pinch from the underside of the **vertical** crease to bring the top corner to point upwards.

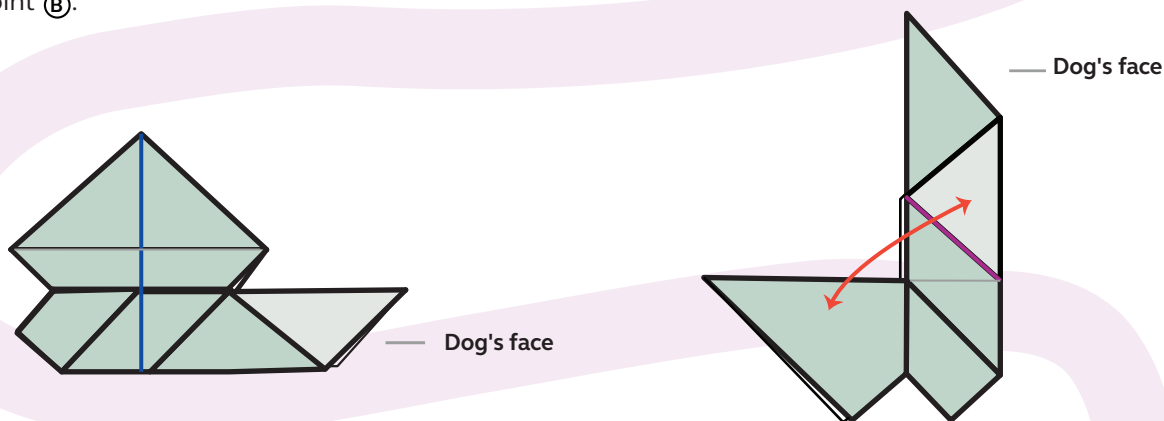

13. Fold this section to the side. Now flip the whole thing over.

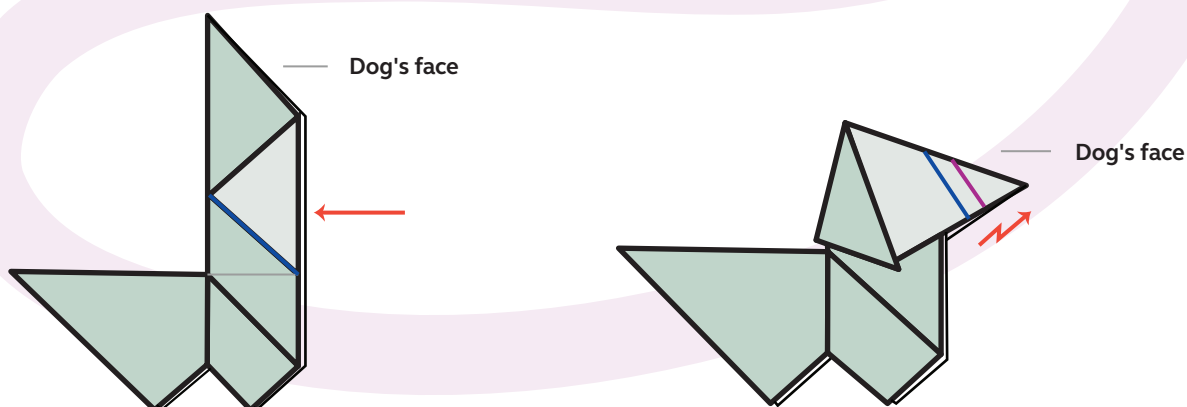

14. Your paper should now resemble the illustration above. Next, **valley fold** along the horizontal crease line, bringing point **(A)** to point **(B)**.

15. Now **valley fold** this section to the left so the point of the dog's face is pointing upwards.

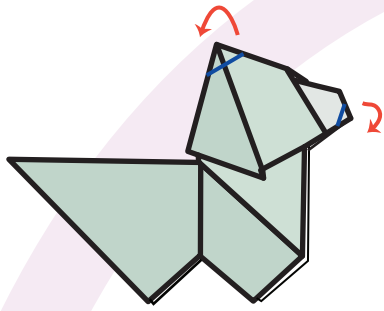

16. Keeping the head section pointing up, **mountain fold** the paper in half along the crease line shown in the diagram. This will create the body and legs of your paper pup.

17. Fold the face along the **crease line** in both directions to reinforce a sharp crease.

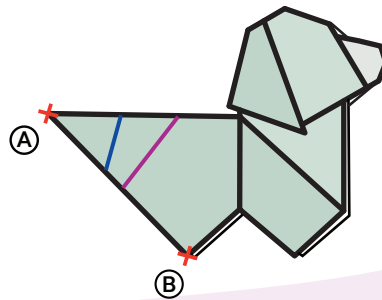

18. Open from the direction of the arrow and, using two fingers, push the pup's head back on the creases just made. 🕒 40 mins 32 secs

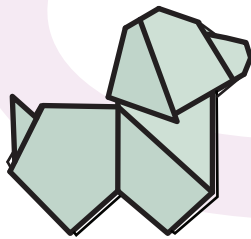

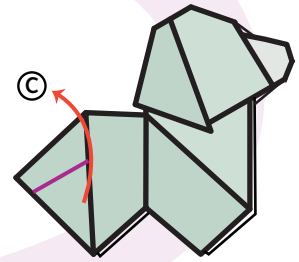

19. Now all that remains is to shape the face and tail of your paper pup. Create a **mountain fold**, followed by a **valley fold** to create a step that will make the puppy's muzzle. 🕒 40 mins 44 secs

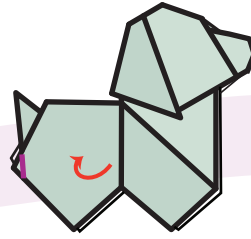

20. Next, **mountain fold** along the crease at the crown to shape the puppy's head. You can tuck in the corner at the dog's mouth if you prefer here too. 🕒 41 mins 21 secs

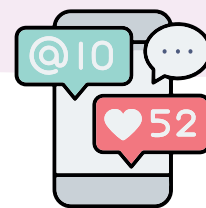

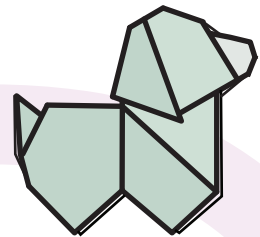

21. To make the tail, fold the left point **A** down the back paw **B**. Now **valley fold** the end of the tail up **C**. 🕒 41 mins 41 secs

22. Opening up from underneath, make the first crease into a **mountain fold** and the second into a **valley fold**, revealing the tip of the tail. 🕒 41 mins 48 secs

23. Finally, tuck in the back point to form the dog's butt. And there you have it, another paper pup to add to your collection! 🕒 42 mins 9 secs

24. Share your pup creations with your pup-loving friends on Instagram, Facebook and TikTok. Tag @pikkiidesign for your chance to win some free pup-related goodies!
