

TIP #1 - Flip the pieces!

The board's pieces are mirrored on the other side. Turning over each piece is necessary to help find the solution each day. Experiment with different ways to complete sections with alternating sides. Since their shape is now mirrored, it will open up new ways for you to combine with the other shapes. **Think of the opposite sides as entirely new pieces.**

Flip and experiment!

TIP #2 - Christmas day is the only day where it is a complete upright picture.

Don't worry about the pieces being upright during the other days of December leading up to the 24th. The other 23 days require the solution to have the pieces upside down and rotated. **On the Christmas Eve and Day however, there is one intended solution** where all the parts of the village will finally connect to make the picture complete. The extra piece at the top should stay there until Christmas Day, it won't help during the other 24 days!

TIP #3 - Don't give up!

This puzzle might be tricky at first, there's a chance you might not even get a solution your first attempts. Don't give up though! It will get easier with time and practice. There are days that will be harder than others, and at times the best trick you can do is to step away from it and then return later with fresh eyes to attempt again. **Good luck and Happy Holidays!**
